To whom it may concern,

I have been acquainted with Anne Kaarid as a school colleague since September 2018, and Anne has since taken on the responsibility of tutoring me, personally, as well as many others in the school.

She is a warm, experienced and extremely capable individual who has been highly effective in terms of communicating the layout of our course information with great patience and the fact that her knowledge is quite extensive only lends to my improvement and higher marks while in school.

She has not only educated me in terms of the subject matter, but also in practical application (massage therapy is a very physical education also).

She is kind, beyond patient and I support her fully in her endeavours in and outside of this school and know she will bring joy, success, efficiency, morality, character and reliability in whatever locale she eventually chooses.

Please feel free to contact me if you have any other questions.
